

Planeta noastră, viața noastră / Our planet, our life

The project is a continuation of the Erasmus + action of the same name. Its goal is to sustain Erasmus + activities, by continuing the partnership virtually, by organizing ecological activities for children aged 3-6 and popularizing them through the eTwinning platform. We want to expand the actions in partnership, by attracting other kindergartens willing to implement environmental protection activities, such as creative recycling, planting trees and flowers, carrying out STEAM activities with a positive ecological impact.
